## Static motorised roller

MADE  IN FRANCE

## For bubble or foam covers.

- A motorised system allowing the rolling up of bubble or foam covers.
- The roller shaft (Ø 125 mm) is in one piece (non-telescopic) to guarantee optimum technical characteristics and minimum load-bearing deflection.
- The product is equipped with a mains powered motor, thereby guaranteeing optimum use even on large pools.
- To ensure correct operation, the roller will be adjusted to have a roller shaft 70 cm wider than the pool.

### Composition:

- 2 white base stands mounted on pool deck fixing plates.
- 1 smooth and fixed roller shaft.
- 1 tubular motor.
- 1 key-operated switch.
- 1 transformer box.
- 1 roller/cover connection kit.

GUARANTEE\*

\*See general conditions of sale.

Photo not contractually binding.

## Forte mobile roller

MADE  IN EUROPE

### For pools up to 10 x 35 m\*.

\* Larger surface areas can be covered by installing several rollers and covers side by side.

- 100 mm square welded stainless steel base stand with 2 wheels on either side.
- $\varnothing$  160 mm static aluminium roller shaft.
- (bespoke roller shaft length = 400 mm more than the pool width).
- $\varnothing$  700 mm hand-wheel and brake.

#### Composition:

- 1 roller.
- Gripper strap fixing system.

#### Packaging:

2 packages	Dimensions in mm	Weight in kg
Stand	400 x 870 x 1000	40
Roller shaft	Bespoke product: dimensions and weight depending on the size of the pool to be covered.	

GUARANTEE\*

\*See general conditions of sale.
